A message of peace and good will from the Young People of Wales to other Young People around the World

Climate Change: Whose fault? Our fault...

Who causes the problems? We do! We are the people who are polluting the World.

Do you hate watching the news? Have you had enough of seeing images of floods, hurricanes, and all sorts of other global problems?

It's your choice - a choice of life or death. Help us create a better future.

Every little step can make a difference. We can use less electricity, save water, recycle, reuse, and support charities.

We must take responsibility. We must tackle the problem.

We invite the World's youth to join us, the young people of Wales, in an effort to create a better future. A green future. A safe future. Together we can stop global warming. We must take action now.

Climate Change: Whose fault? Our fault.
